3. APPRAISER VALUATION RATIONALE (KEY VALUE DRIVERS)

- Color Optics:** 65% tone depth and 85% saturation place this gem in the coveted color tier for Emerald. 75% brilliance with minimal 10% windowing ensures rich scintillation without dark extinction zones.
- Weight Bracket:** At 3.00 ct, this specimen falls in the 3.00 – 4.99 ct tier. Gem pricing scales non-linearly per carat due to natural scarcity in larger rough crystals.
- Provenance & Lab:** Attributed to Colombia (Muzo / Chivor). Supported by Tier 1 Global Lab (GIA / SSEF / Gübelin / AGL) with Minor Traditional Cedarwood Oil.
